Private tour with Yermo of Buckskin Gulch & White Pocket

The Experience: According to the Bureau of Land Management ('BLM') website, Buckskin Gulch is 16 miles long (around 26 km) from the Buckskin Trailhead to the Paria Canyon and over 500 feet (around 150m) deep at its confluence with the Paria River. There are places in the Buckskin where you are able to touch both canyon walls at the same time. It was voted one the top 10 hikes in the world by National Geographic Adventure Magazine a few years back.

White Pocket is a place so remote and amazingly unique that it can feel like you have stepped into another realm where geology decided to bend the rules. White Pocket can appear visually breathtaking while leaving the viewer somewhat perplexed. I have watched people put a hand on their mouth and exclaim: "I don't believe it, how is it possible?" This is one of those places to which pictures do not always do justice.
